

## C&U Europe Mission Statement

The Mission Statement follows the rules of the C&U Group Ltd. China

### 1. The Quality policy

To provide society with the highest quality products and services:  
As a member of the society and enterprises should constantly improve product quality, challenge to "zero defect", provide high-quality physical products to the society, and provide all-round high-quality services. At the same time, they should cultivate excellent talents to the society, strive for perfection, and contribute to the development of national industry and the society.

### 2. Sustainable development policy

To environmental, safety, energy and social responsibility:

“Harmony as One” indicates the seven-color rainbow logo of the C&U Group represents people-oriented employees from all corners of the world. Although they have different personalities, beliefs, ideas and experiences. For the common goal, join hands to enter the human-oriented C&U Family with integrity to be the cornerstone, to get along with each other in unity and fraternity and to work strong for the common ideal.

Unlimited Kindness human oriented enterprises take the initiative to shoulder more social responsibilities while developing themselves and creating economic benefits. Human-oriented employees use the enterprise as a platform to realize their own life value while showing their own rainbow of life. Heart, doing good deeds and doing good deeds throughout your life, makes our lovely society as beautiful as the colorful lights of nature.

### 3. Product safety policy:

Deliver mature technology and standardized procedures to ensure the safety of products and services:

- a) Carry out product design, production, and maintenance with mature technology to ensure product quality and safety from the source.
- b) Continuously and steadily provide products that customers can rest assured with a standardized.
- c) From the perspective of customer safety first, ensure that the products provided are safe and reliable, and the service is at ease.

### 4. Information security policy

Active prevention, Timely detection, Rapid response, and Security:

Through preventive inspections and emergency drill, problems are found in a timely manner, and based on the severity of the problem, rapid response and active handling are performed to ensure the stable operation of information equipment and systems.
